

Microsoft Certified Professional – MCP Assess. Train. Certify.

Program overview

Microsoft Certifications validate IT professional expertise through rigorous, industry-proven, and industry-recognized exams that cover a wide range of Microsoft products, technologies and solutions. Students who become an MCP take their first step in achieving even more distinguished credentials including Microsoft Certified Solutions Expert (MCSE) and Microsoft Certified Solutions Developer (MCSA).

Provision's MCP training products and digital certification bundles support your training business using the latest in Microsoft technologies. Provision allows you to differentiate your business within the IT training and certification market.

See for yourself!

The total list price for an eBook, Microsoft Official Practice Test and exam voucher is \$280.99 (USD). The Provision discounted bundle is \$168.59 (40% savings)!

The diagram illustrates the cost savings of a bundled offer. On the left, three individual items are shown: an eBook titled 'Installing and Configuring Windows Server 2012 R2 Exam Ref 70-410' for \$31.99 (USD), a 'Microsoft CERTIFIED Official Practice Test 70-410' for \$99.00, and a 'Microsoft MCP Certification Exam Voucher' for \$150.00. These items are summed with plus signs. A large blue arrow points to the right, where a rounded box represents the 'Microsoft MCP MeasureUp & eBook Bundle (exam 70-410)'. This bundle contains the same three items, but at a discounted price of \$168.59.

Whatever IT training your students need – security, database, mobility or cloud computing ... Microsoft Certified Professional training and certification helps them achieve their goals and provides a fast track to career success. See details below about Microsoft Certification pathways and align your training curriculum with Microsoft's best-in-class certifications.

Microsoft Certified Solutions Associate (MCSA)

MCSA certification provides core technical skills on the following products and are a prerequisite to the MCSE expert-level certifications.

Windows Server 2008 and 2012	SQL Server 2012
Windows 8, Windows 10	Office 365

Microsoft Certified Solutions Expert (MCSE)

MCSE credentials validate and demonstrate a student's abilities to build innovative solutions across the following Microsoft technologies; both on premise and in the cloud.

Server Infrastructure	Messaging	Enterprise Devices and Apps
Desktop Infrastructure	Communication	Data Platform
Private Cloud	SharePoint	Business Intelligence

Microsoft Certified Solutions Developer (MCSD)

MCSD certification validates a student's ability to design and build solutions that extend beyond traditional platform boundaries across multiple devices and the following applications.

Windows Store Apps	SharePoint Applications
Web Applications	Applications Lifecycle Management

Microsoft Specialist: Azure

Students are able to expand their skills to meet future business needs with certifications focused on developing, implementing and architecting Microsoft Azure. Azure provides more than half of all Fortune 500 companies with cloud services.

For students who are just getting started.

Microsoft Technology Associate (MTA)

The MTA is an introductory Microsoft certification for individuals considering a career in technology. MTA training focuses on validating fundamental technology concepts with the following tracks.

IT Infrastructure	Database	Developer
